INFINITY ELEGANCE

COLLECTION - 2026 / 27

ABOUT US

For over a decade, Nilcore Bath has crafted luxurious sanitary ware that blends refined design with enduring performance. Our wide range is created with thoughtful detailing, smooth finishes, and precision engineering to elevate every bathroom experience. Each product reflects our commitment to comfort, sophistication, and long-lasting quality. Inspired by global aesthetics and modern lifestyles, we design collections that suit grand homes, contemporary spaces, and premium interiors. With elegant craftsmanship and trusted durability, Nilcore Bath continues to redefine everyday bathing with timeless luxury and purposeful design.

**Crafting refined bathroom luxury
for today and tomorrow.**

nilcorebath.com

SIPHONIC TECHNOLOGY

Siphonic technology ensures powerful, noiseless flushing with minimal water use. Its advanced design creates a strong vortex, efficiently clearing waste while maintaining hygiene. Crafted for performance and elegance, it offers seamless functionality and unmatched cleanliness in every use.

FLUSHING TECHNOLOGY

TORNADO FLUSHING

Tornado flushing uses single high-pressure jets to create a powerful spiral motion that reaches every surface of the bowl. The dynamic flow ensures deep cleaning, superior efficiency, and a smooth, visually impressive flush with every use.

SIPHONIC FLUSHING

Siphonic flushing creates a strong vacuum pull that removes waste quickly and thoroughly while using less water. Designed for silent performance, it provides exceptional hygiene, reliable cleaning, and a refined, seamless flushing experience.

WASHDOWN FLUSHING

Washdown flushing delivers direct water flow to push waste downward with consistent force. Its simple yet effective mechanism ensures fast clearing, low maintenance, and reliable performance suited for everyday use with ease and efficiency.

RIMLESS FLUSHING

Rimless flushing eliminates hidden edges, allowing water to circulate freely and clean every corner. This design prevents buildup, enhances hygiene, and makes cleaning effortless while maintaining a sleek, modern aesthetic.

INSTRUCTIONS

WALL HUNG BASIN

Fixing : the rag should be first grouted into the wall using cement / concrete, (as shown) as per the distance between slots provided in the wash basin. The bolts should be fixed perpendicular to the wall. Allow cement / concrete to set. Check if the Rag bolts are firmly fixed. Fix the Wash Basin in the bolts using Nuts & Washer.

CONCEALED WALL HUNG

1. If the wall is going to be plastered for a thickness of 12 and a tile thickness of 6-7, the projection of the bolts from the finished wall should be 66 only.
2. If the thickness of plastering and tile is less than the dimensions mentioned above, the bolt that are supplied along with the bracket should be moved into the wall by using a suitable spacer washer between the bolt head and the bracket frame.
3. The bracket should be buried into the floor so that the height from the center line of the bolt to the surface fo the finished floor is 320.

COUNTER WASH BASIN

(A) Before You Begin

1. Due to typical nature of the installation, under counter basin should be installed by trained and experienced installers.
2. Inspect the waste and supply tubing if necessary.
3. Install the basin in such a way, that it's removal in future can be done freely and without damage.
4. Prior to installation unpack the new basin and inspect it for damage. Keep the product to its protective carton until it is ready to be installed.
5. Observe all local plumbing and building codes.

(B) Tools and Materials

1. Sealant, Pencil, Measure Tape, Sharp knife or scissors, Keyhole or saber saw, Drill (1/2 dia, drill bit or larger) glasses, Haer, Rage or paper toweling.
- NOTE: You may require different, more specialized tools to install this basin on counter top materials other than wood or wood components.

(C) Install the Basin

1. Check the desired lavatory location for clearance between the back splash, faucet, fixture and cabinet.
 2. Cut out the template.
 3. Carefully position and trace the templet on the counter top as directed on the templets.
 4. Mark the faucet hole centerline on the counter top.
 5. Drill a 1/2" pilot hole on the inside of the cut line.
 6. Cut out the counter top opening with a saber or keyhole saw.
- NOTE: Install the basin in such a way that it's removal in future can be done freely and without damage.

FOR WOOD COUNTER TOPS

1. Mark and per-drill the wood screw holes at the locations shown on the template.
2. Waterproof any exposed areas of wood.

FOR MARBLE COUNTER TOPS

1. Position the counter top upside down on foam padding to protect the surface. Mark and drill 3/16" holes 5/8" deep at the locations shown on the template.
2. Use a setting tool and haer to secure the anchors.

FOR ALL INSTALLATIONS

1. If the counter top has not been installed, install it as stated below.
2. Drill the faucet holes according to the faucet installation instruction.
3. Install the faucet to the counter top according to the manufacture's instruction.
4. Install the drain to the lavatory according to the manufacture's instruction.
